

# Writing clean and readable R scripts solution

Ken Mwai

## Data loading

Task 1      Step 1      Step 2 - R Script

- Create a project folder with (data, code ,result , ... folders)
- Use the mtcars dataset within R and check the structure
  - Take a first look at the data. Useful functions are `dim()` , `head()` , `str()` and `summary()` .
- Remember to use good programming approach
